Develop your voice in English.

With *Voices*, learners use English as a tool for global communication and are encouraged to celebrate connections among people from a wide range of cultures and backgrounds. Carefully sequenced activities featuring real world content fully prepare learners for interaction and guide them to **develop their voice in English**.

Voices is a seven-level, integrated-skills programme for adults and young adults that enables instructors to **teach with confidence** in all classrooms. Supported by a common-sense lesson progression and a Virtual *Voices* Toolkit featuring professional development resources, teachers have the learning and teaching materials they need to deliver engaging courses both online and in person.

Learners develop their voice in English by...

- Listening and watching **National Geographic Explorers** share their daily experiences for interesting and relatable models of people contributing their voices to the global English community.
- Answering the question, “What would I do?” in a range of culturally rich and hypothetical situations to practice the **mediation skills** needed to navigate social interactions in English.
- Developing speaking skills using a **practical pronunciation syllabus** focused on clarity and comprehensibility.
